Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-28, drawn to a foot of a support, classified in class 248, subclass
 188+.
- II. Claims 29-32, drawn to support of a computer housing, classified in class 361, subclass 683.
- 2. Inventions computer housing and foot assembly are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a computing device enclosure, such as a PDA may not necessarily need a foot assembly. The subcombination has separate utility such as a foot support for an enclosure of any device such as a microwave oven.
- 3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
